

PROSTHETIC SOLUTIONS
FOR DENTAL IMPLANTS

**Restorative Dental
Components**

Compatible With 25+ Implant Systems

Supports Major Implant Systems :

DESS Dental is a leading third-party supplier of implant components in Europe, with a presence in over 40 countries and a product range that covers more than 30 implant systems.

It offers the widest range of dental abutments and prosthetic solutions 100% compatible with the most popular implant systems in the market.

Our sister company, Sensus(HK) Ltd, is the official dealer in Hong Kong & Macau.

Why you should use DESS components?

Compatibility

Our components are 100% compatible with the original implant systems, ensuring seamless integration.

Warranty

Not only do we offer a lifetime warranty on our products, but we also offer a warranty for the implants on which DESS products were used.

Innovations

We offer angulation correction with Aurum Bases and Ti-bases, each with different Gingival Heights for various cases.

Pure Switch

All DESS screws are completely interchangeable with original manufacturer's screws.

DESS Technology

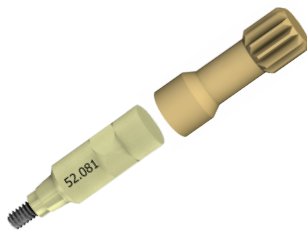

DESS uses grade 5 ELI titanium (Also called grade 23). All materials are purchased from French, Swiss and German suppliers, with guaranteed traceability and quality.

It increases bonding retention up 500%

SelectGrip®

It is a special sandblasted treatment which provided a considerable improvement in retention levels of cemented prosthesis.

IOS Scan Body

- Zirconium Nitride (ZrN) coating for easier scanning
- No screw hole, screwdriver and distortion on the scan
- Orientation shape on a higher position to maximize visibility
- Good Stitching performances for intra-oral use
- No sharp edges to avoid noise
- Comes with a PEEK driver

Ti-Base

- SelectGrip® sandblast included
- Engaging and non-engaging versions
- Different gingival height
- Pure Switch screws as the dental implant brand

Aurum Base

- Angulated Ti-base
- Angulation change up to 25-30 degree
- SelectGrip® to increase the bonding retention
- Gold colour to improve aesthetics

Premilled Blanks

- Made in Titanium Grade V ELI
- Premilled connection: Available in 28 compatibilities
- Minimal gingival transition (0,3mm)
- Total millable length 20mm

New Premilled Blanks with angulation channel now available !
